## Introduction

### Scope of this ISA (NZ)

1. This International Standard on Auditing (New Zealand) (ISA (NZ)) deals with the auditor's responsibility to plan an audit of financial statements. This ISA (NZ) is written in the context of recurring audits. Additional considerations in an initial audit engagement are separately identified.
2. Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. Quality management at the engagement level in accordance with ISA (NZ) 220 (Revised)<sup>1</sup>, in conjunction with adequate planning in accordance with this ISA (NZ) benefits the audit of financial statements in several ways, including the following: (Ref: Para. A1-A4)
  - Helping the auditor to devote appropriate attention to important areas of the audit.
  - Helping the auditor identify and resolve potential problems on a timely basis.
  - Helping the auditor properly organise and manage the audit engagement so that it is performed in an effective and efficient manner.
  - Assisting in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks, and the proper assignment of work to them.
  - Facilitating the direction and supervision of engagement team members and the review of their work.
  - Assisting, where applicable, in coordination of work done by auditors of components and experts.

### Effective Date

3. This ISA (NZ) is effective for audits of financial statements for periods beginning on or after 1 September 2011. *[Note: For effective dates of paragraphs changed or added by an Amending Standard see the History of Amendments].*

### Objective

4. The objective of the auditor is to plan the audit so that it will be performed in an effective manner.

### Requirements

#### Involvement of Key Engagement Team Members

5. The engagement partner and other key members of the engagement team shall be involved in planning the audit, including planning and participating in the discussion among engagement team members. (Ref: Para. A5)

#### Preliminary Engagement Activities

6. The auditor shall undertake the following activities at the beginning of the current audit engagement:

---

<sup>1</sup> ISA (NZ) 220 (Revised), *Quality Management for an Audit of Financial Statements*

- (a) Performing procedures required by ISA (NZ) 220 (Revised) regarding the acceptance and continuance of the client relationship and audit engagement;<sup>2</sup>
- (b) Evaluating compliance with relevant ethical requirements, including those related to independence, in accordance with ISA (NZ) 220 (Revised);<sup>3</sup> and
- (c) Establishing an understanding of the terms of the engagement, as required by ISA (NZ) 210.<sup>4</sup> (Ref: Para. A6-A7)

### Planning Activities

7. The auditor shall establish an overall audit strategy that sets the scope, timing and direction of the audit, and that guides the development of the audit plan.
8. In establishing the overall audit strategy, the auditor shall consider the information obtained from complying with the requirements of ISA (NZ) 220 (Revised) and:
  - (a) Identify the characteristics of the engagement that define its scope;
  - (b) Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required;
  - (c) Consider the factors that, in the auditor's professional judgement, are significant in directing the engagement team's efforts;
  - (d) Consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and
  - (e) Ascertain the nature, timing and extent of resources necessary to perform the engagement.<sup>5</sup> (Ref: Para. A8-A12)
9. The auditor shall develop an audit plan that shall include a description of:
  - (a) The nature, timing and extent of the planned direction and supervision of engagement team members and the review of their work. (Ref: Para A13).
  - (b) The nature, timing and extent of planned risk assessment procedures, as determined under ISA (NZ) 315 (Revised 2019).<sup>6</sup>
  - (c) The nature, timing and extent of planned further audit procedures at the assertion level, as determined under ISA (NZ) 330.<sup>7</sup>
  - (d) Other planned audit procedures that are required to be carried out so that the engagement complies with ISAs (NZ). (Ref: Para. A14-A16)
10. The auditor shall update and change the overall audit strategy and the audit plan as necessary during the course of the audit. (Ref: Para. A17)
- 10A. The engagement partner shall review the overall audit strategy and audit plan.

---

<sup>2</sup> ISA (NZ) 220 (Revised), paragraphs 22-24

<sup>3</sup> ISA (NZ) 220 (Revised), paragraphs 16-21

<sup>4</sup> ISA (NZ) 210, *Agreeing the Terms of Audit Engagements*, paragraphs 9-13.

<sup>5</sup> ISA (NZ) 220 (Revised), paragraph 25

<sup>6</sup> ISA (NZ) 315 (Revised 2019), *Identifying and Assessing the Risks of Material Misstatements*.

<sup>7</sup> ISA (NZ) 330, *The Auditor's Responses to Assessed Risks*.

**Documentation**

11. The auditor shall include in the audit documentation:<sup>8</sup>
- (a) The overall audit strategy;
  - (b) The audit plan; and
  - (c) Any significant changes made during the audit engagement to the overall audit strategy or the audit plan, including significant changes to the nature, timing and extent of the planned direction and supervision of engagement team members and the review of their work,<sup>9</sup> and the reasons for such changes. (Ref: Para. A18-A22)

**Additional Considerations in Initial Audit Engagements**

12. The auditor shall undertake the following activities prior to starting an initial audit:
- (a) Performing procedures required by ISA (NZ) 220 (Revised) regarding the acceptance of client relationships and audit engagements;<sup>10</sup> and
  - (b) Communicating with the predecessor auditor, where there has been a change of auditors, in compliance with Professional and Ethical Standard 1<sup>11</sup>. (Ref: Para. A23)

\*\*\*

**Application and Other Explanatory Material****Scope of this ISA (NZ)** (Ref: Para. 2)

- A1. ISA (NZ) 220 (Revised) deals with the specific responsibilities of the auditor regarding quality management at the engagement level for an audit of financial statements, and the related responsibilities of the engagement partner. Information obtained from complying with the requirements of ISA (NZ) 220 (Revised) is relevant to this ISA (NZ). For example, in accordance with ISA (NZ) 220 (Revised), the engagement partner is required to determine that sufficient and appropriate resources to perform the engagement have been assigned or made available to the engagement team, taking into account the nature and circumstances of the audit engagement. Such a determination is directly relevant when ascertaining the nature, timing and extent of resources necessary to perform the engagement in the overall strategy, as required by paragraph 8 of this ISA (NZ).

**The Role and Timing of Planning** (Ref: Para. 2)

- A2. The nature and extent of planning activities will vary according to the size and complexity of the entity, the key engagement team members' previous experience with the entity, and changes in circumstances that occur during the audit engagement. In planning the audit, the auditor may use project management techniques and tools.

---

<sup>8</sup> ISA (NZ) 230, *Audit Documentation*, paragraphs 8-11, and paragraph A6.

<sup>9</sup> ISA (NZ) 220 (Revised), paragraphs 30 and A91-92

<sup>10</sup> ISA (NZ) 220 (Revised), paragraphs 22-24

<sup>11</sup> Professional and Ethical Standard 1, *International Code of Ethics for Assurance Practitioners (including International Independence Standards)* (New Zealand)

ISA (NZ) 220 (Revised)<sup>12</sup> describes how such techniques and tools may support the engagement team in managing the quality of the engagement.

- A3. Planning is not a discrete phase of an audit, but rather a continual and iterative process that often begins shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit engagement. Planning, however, includes consideration of the timing of certain activities and audit procedures that need to be completed prior to the performance of further audit procedures. For example, planning includes the need to consider, prior to the auditor's identification and assessment of the risks of material misstatement, such matters as:
- The analytical procedures to be applied as risk assessment procedures.
  - Obtaining a general understanding of the legal and regulatory framework applicable to the entity and how the entity is complying with that framework.
  - The determination of materiality.
  - The involvement of experts.
  - The performance of other risk assessment procedures.
- A4. The auditor may decide to discuss elements of planning with the entity's management to help the auditor manage and achieve quality at the engagement level (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters included in the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

#### **Involvement of Key Engagement Team Members** (Ref: Para. 5)

- A5. The involvement of the engagement partner and other key members of the engagement team in planning the audit draws on their experience and insight, thereby enhancing the effectiveness and efficiency of the planning process<sup>13</sup>.

#### **Preliminary Engagement Activities** (Ref: Para. 6)

- A6. Performing the preliminary engagement activities specified in paragraph 6 at the beginning of the current audit engagement assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability manage and achieve quality at the engagement level in accordance with ISA (NZ) 220 (Revised).
- A7. Performing these preliminary engagement activities enables the auditor to plan an audit engagement in order to, for example:

---

<sup>12</sup> ISA (NZ) 220 (Revised), paragraphs A73-A74

<sup>13</sup> ISA (NZ) 315 (Revised 2019), paragraphs 17 and 18 establishes requirements and provides guidance on the engagement team's discussion of the susceptibility of the entity's financial statements to material misstatements. ISA (NZ) 240, *The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements*, paragraph 16 provides guidance on the emphasis given during this discussion to the susceptibility of the entity's financial statements to material misstatement due to fraud.

- Maintain the necessary independence and ability to perform the engagement.
- Determine that there are no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- Determine that there is no misunderstanding with the client as to the terms of the engagement.

Performing initial procedures on both client continuance and evaluation of ethical requirements (including independence) at the beginning of the current audit engagement means that they are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often occur shortly after (or in connection with) the completion of the previous audit.

## Planning Activities

### *The Overall Audit Strategy* (Ref: Para. 7-8)

- A8. The process of establishing the overall audit strategy, subject to the completion of the auditor's risk assessment procedures, may include such matters as:
- The nature of resources (human, technological or intellectual) to be deployed for specific audit areas. For example, the deployment of experienced team members for high risk areas or the assignment of experts to address complex matters;
  - The amount of resources to be allocated to specific audit areas. For example, the number of team members assigned to attend the physical inventory count at multiple locations, the nature and extent of direction and supervision of component auditors and the review of their work in the case of group audits, or the audit budget in hours to allocate to high risk areas;
  - When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates; and
  - How such resources are directed, supervised or used. For example, when team briefing and debriefing meetings are expected to be held, how engagement partner and manager reviews are expected to take place (for example, on-site or off-site).
- A9. ISA (NZ) 220 (Revised) contains requirements and guidance on engagement resources and engagement performance (including direction and supervision of the members of the engagement team and the review of their work).
- A10. The Appendix lists examples of considerations in establishing the overall audit strategy.
- A11. Once the overall audit strategy has been established, an audit plan can be developed to address the various matters identified in the overall audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. The establishment of the overall audit strategy and the detailed audit plan are not necessarily discrete or sequential processes, but are closely inter-related since changes in one may result in consequential changes to the other.

### Considerations Specific to Smaller Entities

- A12. In audits of small entities, the entire audit may be conducted by a very small audit team. Many audits of small entities involve the engagement partner (who may be a sole practitioner) working with one engagement team member (or without any engagement

team members). With a smaller team, co-ordination of, and communication between, team members are easier. Establishing the overall audit strategy for the audit of a small entity need not be a complex or time-consuming exercise; it varies according to the size of the entity, the complexity of the audit, and the size of the engagement team. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the working papers and highlighting issues identified in the audit just completed, updated in the current period based on discussions with the owner-manager, can serve as the documented audit strategy for the current audit engagement if it covers the matters noted in paragraph 8.

*Direction, Supervision and Review* (Ref: Para. 9(a))

A13. ISA (NZ) 220 (Revised) deals with the engagement partner's responsibility for the nature, timing and extent of direction and supervision of the members of the engagement team and the review of their work.<sup>14</sup>

*The Audit Plan* (Ref: Para. 9(d))

A14. The audit plan is more detailed than the overall audit strategy in that it includes the nature, timing and extent of audit procedures to be performed by engagement team members. Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures occurs early in the audit process. However, planning the nature, timing and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances and disclosures before planning all remaining further audit procedures.

A15. Determining the nature, timing and extent of planned risk assessment procedures, and the further audit procedures, as they relate to disclosures is important in light of both the wide range of information and the level of detail that may be encompassed in those disclosures. Further, certain disclosures may contain information that is obtained from outside of the general and subsidiary ledgers, which may also affect the assessed risks and the nature, timing and extent of audit procedures to address them.

A16. Consideration of disclosures early in the audit assists the auditor in giving appropriate attention to, and planning adequate time for, addressing disclosures in the same way as classes of transactions, events and account balances. Early consideration may also help the auditor to determine the effects on the audit of:

- Significant new or revised disclosures required as a result of changes in the entity's environment, financial condition or activities (for example a change in the required identification of segments and reporting of segment information arising from a significant business combination);
- Significant new or revised disclosures arising from changes in the applicable financial reporting framework;
- The need for the involvement of an auditor's expert to assist with audit procedures related to particular disclosures (for example, disclosures related to pension or other retirement benefit obligations); and

---

<sup>14</sup> ISA (NZ) 220 (Revised), paragraphs 29-31

- Matters relating to disclosures that the auditor may wish to discuss with those charged with governance.<sup>15</sup>

*Changes to Planning Decisions During the Course of the Audit* (Ref: Para. 10)

A17. As a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need to modify the overall audit strategy and audit plan and thereby the resulting planned nature, timing and extent of further audit procedures, based on the revised consideration of assessed risks. This may be the case when information comes to the auditor's attention that differs significantly from the information available when the auditor planned the audit procedures. For example, audit evidence obtained through the performance of substantive procedures may contradict the audit evidence obtained through tests of controls.

**Documentation** (Ref: Para. 11)

A18. The documentation of the overall audit strategy is a record of the key decisions in managing quality at the engagement level and a means to communicate significant matters to the engagement team. For example, the auditor may summarise the overall audit strategy in the form of a memorandum that contains key decisions regarding the overall scope, timing and conduct of the audit.

A19. The documentation of the audit plan is a record of the planned nature, timing and extent of risk assessment procedures and further audit procedures at the assertion level in response to the assessed risks. It also serves as a record of the proper planning of the audit procedures that can be reviewed and approved prior to their performance. The auditor may use standard audit programmes or audit completion checklists, tailored as needed to reflect the particular engagement circumstances.

A20. A record of the significant changes to the overall audit strategy and the audit plan, and resulting changes to the planned nature, timing and extent of audit procedures, explains why the significant changes were made, and the overall strategy and audit plan finally adopted for the audit. It also reflects the appropriate response to the significant changes occurring during the audit.

A21. Documentation of the direction and supervision of engagement team members and the review of their work in accordance with ISA (NZ) 220 (Revised) may also provide a record of significant changes to the planned nature, timing and extent of the direction, supervision and review.

*Considerations Specific to Smaller Entities*

A22. As discussed in paragraph A12, a suitable, brief memorandum may serve as the documented strategy for the audit of a smaller entity. For the audit plan, standard audit programmes or checklists (see paragraph A19) drawn up on the assumption of few controls<sup>16</sup>, as is likely to be the case in a smaller entity, may be used provided that they are tailored to the circumstances of the engagement, including the auditor's risk assessments.

---

<sup>15</sup> ISA (NZ) 260 (Revised), *Communication with Those Charged with Governance*, paragraph A13.

<sup>16</sup> ISA (NZ) 315 (Revised 2019), paragraph 26(a).

**Additional Considerations in Initial Audit Engagements** (Ref: Para. 12)

A23. The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For an initial audit engagement, additional matters the auditor may consider in establishing the overall audit strategy and audit plan include the following:

- Unless prohibited by law or regulation, arrangements to be made with the predecessor auditor, for example, to review the predecessor auditor's working papers.
- Any major issues (including the application of accounting principles or of auditing and reporting standards) discussed with management in connection with the initial selection as auditor, the communication of these matters to those charged with governance and how these matters affect the overall audit strategy and audit plan.
- The audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances.<sup>17</sup>
- Other designed and implemented by the firm for initial audit engagements (e.g., the firm's system of quality management may include responses that require another partner or individual with appropriate authority to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance).

---

<sup>17</sup> ISA (NZ) 510, *Initial Audit Engagements – Opening Balances*.

**Appendix**

(Ref: Para. 7-8, and A8-A12)

**Considerations in Establishing the Overall Audit Strategy**

This appendix provides examples of matters the auditor may consider in managing quality at the engagement level. Many of these matters will influence the auditor's overall audit strategy and detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. While some of the matters referred to below may be required by other ISAs (NZ), not all matters are relevant to every audit engagement and the list is not necessarily complete.

**Characteristics of the Engagement**

- The financial reporting framework on which the financial information to be audited has been prepared, including any need for reconciliations to another financial reporting framework.
- Industry-specific reporting requirements such as reports mandated by industry regulators.
- The expected audit scope, including the components at which audit work is expected to be performed for purposes of a group audit, and the extent to which component auditors will be involved.
- The nature of the control relationships between a parent and its entities or business units that determine how the group is to be consolidated.
- The nature of the business segments to be audited, including the need for specialised knowledge.
- The reporting currency to be used, including any need for currency translation for the financial information audited.
- The requirement for an audit of financial statements for statutory, regulatory or other reasons, in addition to audit work performed for purposes of a group audit.
- Whether the entity has an internal audit function and if so, whether, in which areas and to what extent, the work of the function can be used for purposes of the audit.
- The entity's use of service organisations and how the auditor may obtain evidence concerning the design or operation of controls performed by them.
- The expected use of audit evidence obtained in previous audits, for example, audit evidence related to risk assessment procedures and tests of controls.
- The effect of information technology on the audit procedures, including the availability of data and the expected use of computer-assisted audit techniques.
- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews.
- The availability of client personnel and data.

### **Reporting Objectives, Timing of the Audit, and Nature of Communications**

- The entity's timetable for reporting, such as at interim and final stages.
- The organisation of meetings with management and those charged with governance to discuss the nature, timing and extent of the audit work.
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters and communications to those charged with governance.
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement.
- Communication with component auditors regarding the expected types and timing of communications in connection with the audit work performed for the purposes of the group audit.
- The expected nature and timing of communications among engagement team members, including the nature and timing of team meetings and timing of the review of audit work performed.
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit.

### **Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements**

- The determination of materiality in accordance with ISA (NZ) 320<sup>1</sup> and where applicable:
  - The determination of component performance materiality and communication thereof to component auditors in accordance with ISA (NZ) 600 (Revised).<sup>2</sup>
  - The initial expectations about the classes of transactions, account balances and disclosures that may be significant.
- Preliminary identification of areas where there may be a higher risk of material misstatement.
- The impact of the assessed risk of material misstatement at the overall financial statement level on direction, supervision and review.
- The manner in which the auditor emphasises to engagement team members the need to maintain a questioning mind and to exercise professional scepticism in gathering and evaluating audit evidence.
- Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified deficiencies and action taken to address them.
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity.

---

<sup>1</sup> ISA (NZ) 320, *Materiality in Planning and Performing an Audit*.

<sup>2</sup> ISA (NZ) 600 (Revised), *Special Considerations – Audits of Group Financial Statements (Including the Work of Component Auditors)*, paragraphs 35–36.

- Evidence of management's commitment to the design, implementation and maintenance of sound internal control, including evidence of appropriate documentation of such internal control.
- Changes within the applicable financial reporting framework, such as changes in accounting standards, which may involve significant new or revised disclosures.
- Volume of transactions, which may determine whether it is more efficient for the auditor to rely on internal control.
- Importance attached to internal control throughout the entity to the successful operation of the business.
- The process(es) management uses to identify and prepare the disclosures required by the applicable financial reporting framework, including disclosures containing information that is obtained from outside of the general and subsidiary ledgers.
- Significant business developments affecting the entity, including changes in information technology and business processes, changes in key management, and acquisitions, mergers and divestments.
- Significant industry developments such as changes in industry regulations and new reporting requirements.
- Other significant relevant developments, such as changes in the legal environment affecting the entity.

#### *Nature, Timing and Extent of Resources*

- The human, technological and intellectual resources assigned or made available to the engagement (e.g., assignment of the engagement team and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas where there may be higher risks of material misstatement).
- Engagement budgeting, including considering the appropriate amount of time to set aside for areas where there may be higher risks of material misstatement.

**ACCOMPANYING ATTACHMENT: CONFORMITY TO THE INTERNATIONAL STANDARDS ON AUDITING**

This conformity statement accompanies but is not part of ISA (NZ) 300.

**Conformity with International Standards on Auditing**

This International Standard on Auditing (New Zealand) (ISA (NZ)) conforms to International Standard on Auditing (ISA) 300 *Planning an Audit of Financial Statements*, issued by the International Auditing and Assurance Standards Board (IAASB), an independent standard-setting board of the International Federation of Accountants (IFAC).

Paragraphs that have been added to this Auditing Standard (and do not appear in the text of the equivalent ISA) are identified with the prefix “NZ”.

This ISA (NZ) incorporates terminology and definitions used in New Zealand.

Compliance with this ISA (NZ) enables compliance with ISA 300.

**Comparison with Australian Auditing Standards**

In Australia the Australian Auditing and Assurance Standards Board (AUASB) has issued Australian Auditing Standard ASA 300 *Planning an Audit of a Financial Report*.

ASA 300 conforms to ISA 300.
